CONCRETE FLOOR POLISHING

Concrete floor polishing is a popular, cost-effective choice for new builds and existing surfaces. And Browning Chapman has the experience and industry-leading equipment needed to give your floors the look you want. Besides adding visual appeal with a range of finish options, this environmentally-considerate process protects health—drastically reducing the growth of allergens, mold and bacteria.

IMPROVES HEALTH AND SAFETY

Properly polished concrete is one of the safest flooring choices, and added slip-resistance helps to meet or exceed pertinent OSHA and ADA standards. Also, by reducing crevices where dust, allergens and bacteria can hide and breed, polished concrete improves indoor air quality and protects the health of your building's occupants.

LOWERS MAINTENANCE

Polished concrete is an extremely durable and damage-resistant surface. It's also easy to clean. Minimal sweeping, mopping or vacuuming, paired with common-sense precautions, can keep a finished floor looking new for decades—eliminating the possibility of chipping, peeling or flaking.

ADDS SUSTAINABILITY

As a more environmentally-friendly flooring solution, polished concrete requires only an existing concrete subfloor, and no other floor materials. Treatment with diamond tools and abrasives produces little waste—and the simplicity of future maintenance reduces the need for cleaning chemicals. Finally, the finished surface releases no toxic fumes or VOCs.

ENHANCES APPEARANCE

Polished concrete is a cost-effective solution that looks terrific. The visual benefits begin with a high-end reflective sheen, and are expanded by a spectrum of dyes and pigments that let you create an outstanding, one-of-a-kind surface—one that pairs perfectly with your company's brand.

EXAMPLES OF AVAILABLE FINISHES

MULTIPLE AGGREGATE EXPOSURES

- Cream Polish
- Salt and Pepper Polish
- Exposed Aggregate Polish

MULTIPLE SHEEN LEVELS

STAINS & DYES

ACID STAINING
