PARKING GARAGE SERVICES

Few structures receive as much daily wear and tear as parking garages, resulting in: cracked, uneven surfaces; chipped-away columns; crumbling stairwells; and multiple other signs of wear. Browning Chapman's extensive experience in concrete and steel repair can keep garages safe for those who use them, while mitigating risk liability for those who own them.

ASSESSMENT

Evaluating the needs of your garage requires a thorough understanding of the structure, and the elements that it faces. Our team has the experience to accurately assess those conditions.

PREPARATION

Starting with a properly prepared surface is the most important step in any parking garage project. We will remove existing flooring material, clean, inspect the concrete slab beneath, and repair any damage to provide a sound, level foundation for the work that follows.

REPAIR

After problems have been identified, we will provide the appropriate solutions, by performing high-quality, durable repairs. These surfaces can include concrete patching, carbon fiber wrapping, epoxy injections, reinforcement with supplemental steel, post-tensioning, line striping, and more.

FINISHES

Our sealing and waterproofing services can protect your garage from cracks and other damage caused by moisture and temperature changes.

MAINTENANCE

We can create a custom repair and maintenance plan designed around your garage, to keep the structure looking good and performing at its best.
