RESINOUS COATING SERVICES

Popular in commercial and industrial settings, Browning Chapman's resinous coatings protect the surfaces beneath them—resisting oil and grease spills, while containing battery acid and other chemical leaks. Adding visual appeal with a range of colors and textures (including metallic, partial-flake, and full-flake options), our easy-to-clean coatings create smooth, durable, high-performance floors that stand up to heavy traffic and passing years.

STRENGTHENS DURABILITY

Resinous-coated flooring withstands wear and tear, resists oil and chemicals, and doesn't chip or crack easily when impacted. All of which reduces the risk of damage, protects the underlying concrete, and provides your space with a long-lasting solution.

REDUCES MAINTENANCE

Nearly any substance spilled on a resinous-coated floor can be swept, mopped or wiped away—avoiding staining and lessening time spent on maintenance.

IMPROVES SAFETY

Resinous coating creates a seamless surface, eliminating cracks where mold and bacteria can form. The resulting surface eliminates allergens, and protects the health of building occupants. And when a slip-resistant additive such as mica or quartz is added, it reduces the risk of falling accidents.

ADDS VISUAL APPEAL

Adding beauty and value to any structure, resinous coatings are available in various colors and textures (and even stenciled logos). The high-gloss surface reflects light, and can add visibility by increasing the brightness of interior spaces.

EXAMPLES OF AVAILABLE FINISHES AND ENHANCEMENTS

PIGMENTED EPOXY SYSTEMS

CORROSION INHIBITING

PEDESTRIAN & HEAVY-TRAFFIC URETHANE COATINGS

DECORATIVE VINYL FLAKE EPOXY SYSTEMS

DECORATIVE CERAMIC QUARTZ EPOXY SYSTEMS

DECORATIVE METALLIC SYSTEMS

MMA ACRYLIC SYSTEMS

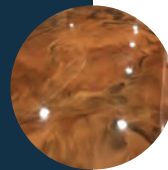

MOISTURE MITIGATING SYSTEMS

LINE STRIPING

CHEMICAL CONTAINMENT COATINGS

POLYURETHANE THERMAL SHOCK RESISTANCE SYSTEMS

CLEAR SEALERS
