SEALANT SERVICES & WATERPROOFING

By properly sealing concrete and masonry joints, Browning Chapman's sealant services can protect your building and/or pavement from cracks and other damage caused by moisture and changes in temperature. In addition to guarding property against exposure to the elements, professional sealing and waterproofing can keep out damaging water, oils and grease—all while making your surfaces easier to clean and maintain.

WATERPROOFING AND JOINT SEALING

By relieving stress points, joints permit concrete and masonry to expand and contract properly. Appropriate sealing of those joints will create a secure waterproofing barrier, and help to prevent deterioration caused by water infiltration. Browning Chapman has the experience needed to assess surfaces, prepare them properly, select the right sealant, and apply it perfectly—putting your mind at ease with results that perform for years.
